Precision offers High Traffic Class B airspace training

Newberg, OR - September 17, 2007 – Precision Flight Training is offering a new fixed wing course on how to navigate through busy Class B airspace. The focus is to provide General Aviation pilots with the knowledge to confidently traverse the Seattle-Tacoma area with a minimum of time, hassle and stress.

“This is a great way for existing pilots to get a better handle on what to expect in Class Bravo airspace,” says Tyler Sturdevant, an Instrument Instructor at Precision Flight Training. “Most people shy away from busy airspace, but with the right training and knowledge, it's not that difficult to negotiate your way through the Seattle area, and there are a lot of advantages of being able to do so.”

This new course will allow pilots to take more direct routes through the Seattle-Tacoma area, and provides a better selection of destination airports, increased confidence, and the safety of being under radar coverage. For details and pricing, visit the *Class B Training* page on Precision’s web site: <http://www.flyprecision.com/classb.html>

Precision Flight Training offers helicopter and airplane flight instruction for private pilot, commercial pilot and flight instructor certification, as well as a range of specialized ratings. For complete curriculum information, visit www.flyprecision.com or call (503) 537-0108 or toll-free (800) 55-GOFLY.

Established in 1983, Precision Flight Training is located at the Chehalem Airpark campus, four miles west of Newberg, Oregon. Precision is a full-service aviation company providing complete services for helicopters and fixed wing aircraft, including flight training, charter, maintenance, sales and aviation business consulting.
